Mr. LaRcque

Dear Andrea,

Having a mentor was and is useful. Because of your background, of course, the mentorship has helped with certain aspects of what I have been going through. For instance, regarding the aspects that touched on moral questioning and interpersonal relations, you were very helpful. While I had many times already figured things out, to have you gently guide me and validate my approach helped be surer of my convictions. Now that I have left agileDSS, I do not regret the decision and you played a part in this.

Everything I do and will do will rely on trusted business relationships. It's all about people. I believe our chats will continue to help. I value that I can run things by you. You have always made yourself available and I thank you for your support.

Best regards,

M
